THE TRAGEDY AT CANNES.

The tragedy at Cannes which has sen a thrill through the society circles of two have the long end of it, taken all through." continents brings to the front again the folly of a flirtations wife, the recklessness of a lover who fancied himself secure and the crime of a husband who found his jealous suspicions only too well supported by the evidence of circumstances.

Mr. EDWARD PARKER DEACON, grandson of an old Commodors of the United States Navy, was received in social circles everywhere as an accredited representative of Boston's best blue blood. His wife, the daughter of a Rear-Admiral. had not less social prestige. The husband was handsome and manly, the wife beautiful and brilliant. They had wealth to spare, and lavishly entertained their sixty-three, with a shrunken figure but a pl friends at home and abroad.

It would seem that the legitimate pleas ures of her position and her wealth might have sufficed for a wife so fortunate in goods and graces. Or that her own dignity if not her sense of wifely feality should have kept her from compromising associations. That they did not do so is indicated by the circumstances of the tracedy and by the flood of old gossic suddenly turned into the public car by the event of Cannes.

The social eminence of the parties to this affair lends more than ordinary prominence to the event. It does not alter the stern import of exactly similar occurrences in higher and lower spheres of life the import of a terribly solemn warning of the absolute peril to herself and others brought on by a wife who thoughtlessly allows the appearance of deviation from the strict line of her mari-
